### **RESPONSE TO AMENDMENT**

1. Applicant's amendment filed 16 September 2003 is acknowledged. Claims 1-4 and 6-22 are pending and under examination in this office action. The text of those sections of Title 35, U.S. Code, not included in this action can be found in a prior office action.

#### ***New Grounds of Rejection***

2. Claims 1-4 and 6-22 are newly rejected under 35 U.S.C 112, second paragraph, as indefinite in the recitation of "selectively" or "specifically". These terms are not defined in the specification and one of skill in the art would not know what degree of binding was encompassed. Omission of these terms so that the claims simply required 'binding' would overcome this rejection.

3. Claims 1-19, 21, and 22 are also rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. These claims are drawn to antibodies against proteins comprising the mth protein. Thus they encompass antibodies against any sequence that might be added to the protein, such as an epitope tag.

4. Claims 1-8 and 15, 16, and 21 are newly rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. These claims encompass antibodies against molecules that, when not expressed, are lethal. Such molecules must be naturally occurring for the absence of their expression to have an effect. Thus they have particular sequences whose precise composition, except for SEQ ID NO: 2, is not known and not predictable. Unless these sequences are

Art Unit: 1646

explicitly set forth Applicant can but said to be in possession of them, or of antibodies against them.

NO CLAIM IS ALLOWED.
